## BRING YOUR OWN DEVICE (BYOD) COMPUTER REQUIREMENTS

Bring Your Own Device (BYOD) defines a program delivery model that requires you to have a laptop that meets the technical specifications outlined for this program, and to bring the laptop to all in-class sessions (unless otherwise specified by the instructor). These specifications include hardware requirements based on the software tools and learning outcomes for this program. In addition, as a blended delivery program, you will require a computer to complete the online components of each course.

Laptop requirements:

The laptop requirements for this program are as follows:

- > PC Windows laptop (**Preferred Option**) - i7 processor is recommended for this program.
- > If you intend to use a Mac, you will be required to have your Mac laptop configured to run Windows and Windows based software using VMware Fusion or equivalent. **Please note that BCIT does not provide direct support of these products on Mac hardware. You will be responsible for ensuring compatibility with the required software on a course-by-course basis.**

Technical specifications:

The recommended technical specifications for this program are as follows:

- > Intel i7 or equivalent processor:
  - > Multi-threading capability
  - > 64-bit architecture preferred (processor must support virtualization)
- > 16 GB of RAM (or option to add more RAM)
- > 512 GB HD
- > High-end graphics card (consider a dedicated video card with 1 GB of video memory)
- > Wireless 802.11 b/g
- > Windows 10
